CONIFA

The Confederation of Independent Football Associations, is the football federation for all associations outside FIFA. It's a global acting non-profit organization that supports representatives of international football teams from nations, de-facto nations, regions, minority peoples and sports isolated territories.

City of Sabbioneta

On 7th July 2008, Mantua and Sabbioneta were listed by UNESCO as a World Heritage site. A single site for two cities which were at the centre of an intense cultural scene during the Renaissance. Indeed, both offer an exceptional testimony to the urban planning, architecture and art of the period, and were linked by the ideals and ambitions of the ruling Gonzaga family. Different, but at the same time complementary: the newly-founded city of Sabbioneta, designed by Vespasiano Gonzaga Colonna as the perfect capital for his dukedom in the 16th century, and Mantua, founded in Etruscan - Roman times and constantly developing while still preserving its Renaissance character. A heritage to be protected, respected and handed down to future generations.

Per Anders Blind
CONIFA | Global President

Dear Friends!

It's a huge honor for CONIFA to welcome you all to such a beautiful and stunning location as Sabbioneta. We've all been forced to live in a "bubble" for two long years now due to the pandemic situation and we know it has been a massive challenge for all.

The CONIFA Football Strategy Days is an very important opportunity for you as member to influence and express your thoughts about the future path of CONIFA in terms of events, activities and other areas of development. I hope these days will be filled with constructive dialogues focused on how we all can support each other – together, we are strong !

To find an opportunity and a very representative location to finally come together has been a long journey and as President, I especially want to send a thank you to the European Committee delegates and their President for making this event possible together with an world class collaboration with the Municipality of Sabbioneta.

The longing to finally come together and be given the opportunity to meet both new and old friends are finally coming to an end. Welcome to the CONIFA Football Strategy Days 2022.

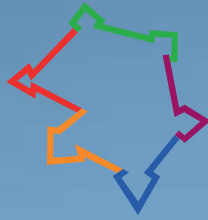

Marco Pasquali
Mayor | Municipality of Sabbioneta

Our City is proud to host an international event of this magnitude. It was born as the "Ideal City of the Renaissance", now Sabbioneta is ready for international challenges and capable of increasing the value of any initiative that we will be able to develop here, with a trained staff, welcoming spaces, with a modernity that dialogues with the ancient.

The welcome reserved for CONIFA is a symbol of a dynamic city, in step with the times, projected towards a contemporary world capable of relaunching itself after the difficult years that the whole world has gone through and which is still struggling to leave behind. Sabbioneta as a city of peace, cooperation, intercultural development.

Enjoy your time in Sabbioneta!
